Qiziltepa district, Navoi region, Uzbekiston

ABOUT ME

I am a frontend developer with 1 year of experience. I know Next.js, TypeScript, JavaScript and React Native. I did educational practical projects on web and mobile applications. I have extensive experience and skills in understanding customer requirements, designing and providing user-friendly solutions.

SKILLS

- TypeScript
- JavaScript
- React.js
- Next.js
- React Native
- HTML
- CSS
- SASS & SCSS
- Tailwind CSS
- Chakra UI
- Node.js
- MongoDB
- Postman
- ChatGPT
- Git & Github

LANGUAGE

- Uzbek
 - English
-

PROJECTS

Subscription web application

Subscription web application using Stripe and Next.js. I used Firebase to handle user registration from the app. In the app, the user can use Next.js through the API route and change the subscription through 3 different plans linearly. Once the payment is made, the web application can be fully used.

Primary technologies: [TypeScript](#), [Next.js](#), [Stripe](#), [TailwindCSS](#), [Firebase](#), [Formik](#).

Demo: subscription.asqarbekdev.uz | **Github:** github.com/asqarbekolimov/subscription-web-app

Educational platform

This project focuses on Next.js components and Next.js SSR and SEO. Framer Motion is used for animations on the site and the design is done with CSS modules.

Primary technologies: [TypeScript](#), [Next.js](#), [CSS module](#), [SSR](#), [SEO](#), [React hook form](#), [Framer Motion](#).

PORTFOLIO WEBSITE

My site with my completed projects and other information about myself. The UI part of the website written in Next.js uses Shadcn UI, translated into 3 languages, animated with React Reveal and optimized for mobile settings.

Primary technologies: [TypeScript](#), [Next.js](#), [TailwindCSS](#), [18next](#), [SEO](#), [React Reveal](#).

EDUCATION

MahirDev MERN Stack Practicum

About the course: The course covers the basics of JavaScript and TypeScript, then uses React.js and Next.js to create dynamic and static frontend interfaces. At the same time, creating an API in Node.js, working with a database in MongoDB, connecting the frontend with the backend, and completed full-stack projects.
